HOW TO CITE

Leveraging Technology to Support
Individuals with Autism Spectrum
Disorder (Session). (2025). *III
International Autism Conference
Research & Practice*, 1(1).

ABSTRACT

This session explores the transformative potential of technology in supporting individuals with autism spectrum disorder (ASD). It will discuss innovative approaches to enhancing communication, accessibility, and daily support through digital tools and platforms. The session will highlight how technology can bridge critical gaps, offering new opportunities for non-verbal communication, therapy access, and diagnostic tools. By showcasing real world applications, this discussion aims to demonstrate the profound impact of technology on improving the lives of individuals with ASD and their caregivers.
